Summary

Frontend web-developer with a Computer Science degree. Highly adaptable and results-driven problem solver. With an open-minded and friendly personality, I thrive in collaborative environments, constantly finding better ways to accomplish tasks. I embrace new challenges and always seek opportunities to learn and grow personally and professionally. Let's work together to achieve great things, no matter the circumstances

Skills

Languages: HTML | CSS | JavaScript
Frameworks: React | Tailwind
Databases: MongoDB | Microsoft Access
Other Tools: Git | GitHub | Slack | Discord | Microsoft Office (Word, Excel, PowerPoint, Outlook) | Google Forms | WordPress

Experience

MEST Africa – Accra, Ghana | Frontend Web Developer Intern | 11/2024 - 12/2024
I contributed to the DigiCurriculum repository on GitHub by enhancing the platform's frontend with **React**, Shadcn UI, and Tailwind CSS. My work focused on refining user interface components to improve accessibility and overall user experience, while also collaborating with the team to optimize performance and ensure seamless functionality across the platform.

Tamale Technical University - Tamale, Ghana | National Service Personnel |11/2022 - 10/2023
I was responsible for teaching Computer Literacy to students at the introductory level, ensuring that lessons are engaging and accessible. I was also responsible for organizing quizzes and exams, creating assessment materials, and ensuring fair grading practices while maintaining the confidentiality and security of students' grades. I carefully evaluated students' work, offered constructive feedback, and accurately recorded their grades. I maintained confidential records to monitor student progress and also identified areas for improvement.

Talensi District Assembly - Upper East Region, Ghana | Intern | 09/2021 - 12/2021
As a computer science intern, I offered comprehensive technical support, resolving software and hardware issues, troubleshooting network connectivity problems, and providing guidance on computer usage. My prompt assistance ensured uninterrupted workflow and efficient operations within the district assembly office. It also played a vital role in preparing district files and essential audit documents, ensuring accuracy, completeness, and integrity of records, adhering to protocols and implementing quality control measures. Contributed to transparent and successful audits, promoting overall accountability within the district assembly

Projects

Artisan Service App
Frontend Developer | Dashboard & API Integration

- Developed a user-friendly dashboard for the artisan service app, featuring sections for personal details, orders, and notifications.
- Integrated API functionality to fetch, display, and manage artisan services.
- Utilized React Router, Shadcn UI, and Tailwind CSS for a seamless user experience**.**

Library Management System
Frontend Developer | Full Stack Development

- Built a full-stack library management system using React, Tailwind CSS, and a RESTful API for managing books.
- Developed a book display component, add new book form, and implemented delete functionality.
- Focused on clean and modern UI/UX, ensuring the system was both responsive and easy to use.

Education

BSc Computer Science | 2018 - 2022
University For Development Studies, Ghana | Graduation: 11/2022

Tamale Senior High | General Science | 2015 - 2018
